Activity - 2

Name : Aliketha. M

SPN : R2SEFI66

While working on this activity, I faced a few difficulties during the installation and setup and installing process first, I had some difficulty downloading the correct Node.js LTS version as I was not sure which version to select and where to download it from. After installing using the terminal, I also found some difficulty creating using the Terminal I also faced some difficulty creating a new folder and open the VS code initially, as I was using it for the first time. This activity helped me understand Node.js, npm, Axios, Apple and Postman.
